

Please join us this Spring! K-12 Project WET Workshop

May 4, 2019

You are cordially invited to a workshop this May that will keep your mind engaged, often on your feet and immersed in practices at the heart of Common Core and Next Generation Science Standards – All while experiencing activities that will help you and your students study local water resources and their relationship to the watershed!

The interdisciplinary Project WET (**Water Education for Teachers**) are an effective tool for integrating student knowledge of concepts and skills related to water resources into activities that include real-life based scenarios and simulations that provide strong foundations for STEAM, Project-based and Service-Learning programs.

Project WET activities are designed to supplement existing curriculum, including the use of EEI (**Education & the Environment Initiative**) curriculum units – and are *correlated to Common Core and Next Generation Science Standards*.

Each participant will receive: *Hands-on experience with great water conservation activities and California specific content to study water issues in your class and a copy of the Project WET Guide 2.0 which includes free access to over 110 Project WET activities. Optional 0.6 CEU available, more information at workshop.*

May 4, 2016 (9:00 am - 3:00 pm)
Mendocino County Office of Education
River Room (Cedar Building)
2240 Old River Road
Ukiah, CA 95482
