FREE BRIEFING**

Dry, Wet or Average? The Challenges for Water Project Operations

FEBRUARY 23, 2016

**Sacramento Convention Center
1400 J Street, Room 202
Sacramento, CA**

Sponsored by

**WATER EDUCATION
FOUNDATION**

Water year 2016 has officially begun. Even as the potential for heavy El Niño rains has captured the attention of the public, state and federal officials know that the drought-impacted reservoirs will not recover that quickly.

*Hydrologic conditions, precipitation patterns, the need for fishery flows, and forecasts of water project operations will all be discussed at a special **FREE** briefing February 23, 2016. Sponsored by the California Department of Water Resources and the Water Education Foundation, the briefing will be held at the Sacramento Convention Center.*

*Check-in/registration begins at 9:00 a.m. Complimentary coffee will be served. The program runs from 9:30 a.m. to noon and from 1:30 to 3:30 p.m. **Lunch is on your own.***

This **FREE, one-day briefing** is for anyone interested in understanding how this year's hydrology is affecting water project operations, including members of the media, elected officials, legislative aides, water district managers and board members, state and federal agency officials, city and county government officials, farmers, environmentalists, attorneys, consultants, engineers, business executives and public interest groups.

Topics to be addressed include:

- Hydrologic conditions in context
- Water project hydrologic and operational constraints
- Overview of groundwater conditions
