

Number 9

Your family moved to the suburbs that grew during the post- WWII housing boom. Your large lot suburb has now become part of the city and receives metered water.

use 3 cups

Number 13

You are a water bottling company that is interested in moving your business to town do to the easy access to water resources.

use 6 cups

Number 10

You are a high-tech business that has moved here to take advantage of the easier access to resources and lower taxes. You need highly pure water to make computer processors.

use 2 cups

Number 14

You want to start a business to make and install rainwater harvest systems for local homes and businesses. Water is used in production, but the captured water reduces demand on treated city water. Pour 1 cup back into the jug.

use 2 cups

Number 11

Your family started an organic farm and you have expanded it into a very profitable Community Supported Agriculture business

use 4 cups

Number 15

You would like to start a landscaping business specializing in native, drought tolerant designs. Your gardens will reduce the demand for city water. You can pour 1 cup back into the jug.

use 2 cups

Number 12

You would like to start a microbrewery for high quality root beer and other old time soda pops.

use 4 cups

Number 16

You would like to start a business that produces low flow water devices for area businesses and homes. Water used in production will be offset by savings from the devices. Pour 2 cups back into the jug.
